SUMMARY

Aspiring machine learning engineer with coursework in deep learning and computer vision. Projects in image classification, NLP and model deployment.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++
- **Machine Learning:** PyTorch, TensorFlow, Scikit-Learn, Keras, OpenCV, Hugging Face Transformers
- **Data Tools:** NumPy, Pandas, Matplotlib, Jupyter
- **Other:** Git, Linux, FastAPI, MLflow

EDUCATION

Osmania Institute of Technology (Sample) 2026
Bachelor of Technology (B.Tech.) in Artificial Intelligence

PROJECTS

1. Plant Disease Image Classifier | Python, PyTorch, OpenCV
- Trained a convolutional neural network to classify 12 leaf diseases with data augmentation
- Compared transfer learning against training from scratch and plotted the confusion matrix

2. Sentiment Analysis of Product Reviews | Python, Hugging Face Transformers, Scikit-Learn
- Fine-tuned a pretrained transformer model on 50,000 labelled reviews
- Benchmarked it against a TF-IDF and logistic regression baseline

3. Model Serving API | FastAPI, Docker, MLflow
- Wrapped a trained model in a FastAPI service and tracked experiments with MLflow
- Packaged the service as a Docker image

CERTIFICATIONS

- Deep Learning Specialization - online course (sample)
- Machine Learning - Stanford Online (sample)

PERSONAL DETAILS

- Languages Known: English, Telugu, Hindi
- Address: Hyderabad, Telangana
